WORK EXPERIENCE

Application Programmer (Full Stack Developer) Kenna Communication LP - Leading IT solutions provider for communication and technology services
Mississauga, ON, Canada May 2023 – September , 2025

- Served as full-stack developer on the Vision Rewards USA project, utilizing React.js, Node.js, and SQL Server to build a robust rewards management platform.
- Designed and maintained features for tracking customer rewards, payments, and transactions, enabling clients to monitor activity in real-time.
- The system improved customer engagement and streamlined rewards operations, saving time and enhancing transparency for clients.

Full-Stack Developer Building Toronto Caulking – Construction Company managing diverse construction projects, Toronto, ON, Canada June 2022 – March 2023

- Developed a Business & Task Management Information System (BTMIS) to manage financial, HR, and administrative operations.
- Built scalable, user-friendly applications using React.js, Node.js/Express, MySQL, HTML5, CSS3, and Bootstrap, improving workflow speed and transparency.
- Streamlined company processes, reducing manual tracking errors and enhancing operational efficiency.

Full-Stack Developer MRRD – Regional Programs Coordination Office (RPCO) National rural development program delivering community-based infrastructure and irrigation projects across Afghanistan
January 2020 – August 2021 | Afghanistan

- Developed a centralized project management and monitoring system for nationwide rural infrastructure projects, saving 100+ staff hours per month.
- Built web applications using React.js, Node.js/Express, SQL Server, HTML5, CSS3, and Bootstrap, improving cross-department coordination.
- Delivered dashboards and analytics tools that enhanced leadership decision-making and program efficiency.

Software Developer (Full Stack) CMS Justice Sector Support Program (JSSP) – U.S. Department of State–funded judicial reform initiative
Jan 2017 – Dec 2019 | Kabul, Afghanistan

- Developed Case Management Systems (CMS) for criminal and civil courts, supporting 1,000+ judiciary users and positively impacting thousands of case participants.
- Built scalable applications using React.js, Node.js/Express, SQL Server, HTML5, CSS3, and Bootstrap, improving case resolution efficiency and data integrity.
- Collaborated with legal professionals and international advisors to translate judicial processes into user-focused solutions.
